PROFESSIONAL SUMMARY

Data Analyst with 6+ months of production experience in AI/ML data quality at Hive. Skilled in Python, SQL, Power BI, and Excel with a track record of delivering clean, audit-ready datasets at scale, independently managing QA workflows, and translating analysis into actionable business decisions.

EXPERIENCE

Data Analyst | Hive AI

October 2025 – May 2026

- Conduct data validation, anomaly detection, and QA audits on large-scale AI/ML datasets spanning text, image, and structured data types using Python and Google Sheets.
- Identify labelling gaps, inconsistencies, and data-quality risks through rule-based checks and statistical profiling, working solo and reviewing peers' outputs.
- Maintain dataset integrity for downstream model training by enforcing QA standards and improving audit workflows within structured sprint cycles.

PROJECTS

[Credit Card Fraud Detection](#) — *Power BI · Python · Excel*

- Analysed 555,000+ transactions (0.39% fraud rate) to identify risk patterns across time, geography, gender, and merchant category using Power BI.
- Built DAX-calculated risk score classification logic based on transaction amount thresholds and behavioural flags surfacing high-risk segments for business review.
- Designed an executive-level dashboard with hourly fraud probability curves, category-wise fraud breakdown, and geographic transaction mapping.

[Northwind Business Analysis](#) — *MySQL · Power BI · Excel*

- Conducted end-to-end BI analysis of a global trading company across 91 customers, 77 products, and 29 suppliers spanning 21 countries, writing 14+ MySQL queries using CTEs, window functions (LAG), and correlated subqueries.
- Built 5 interactive Power BI dashboards (Customers, Sales, Operations, Suppliers, Employees) surfacing a 36% on-time delivery rate, \$141K single-SKU revenue concentration risk, and a 47% Q3 order volume drop, each paired with a prioritised business recommendation.

[Hotel Booking Channel Analysis](#) — *SQL · Python*

- Analysed booking data across channels to identify revenue contribution by source, seasonal demand shifts, and underperforming booking windows.
- Delivered structured insights on customer booking behaviour that guided marketing budget reallocation and channel prioritisation for the revenue team.

SKILLS

Languages	Python (Pandas, Matplotlib, NumPy), SQL (MySQL, PostgreSQL)
Visualisation	Excel (Macros-VBA, Pivot Tables, What-If Analysis), Power BI (DAX, Dashboard Development)
Data Skills	Data Cleaning & Transformation, Anomaly Detection, Statistical Profiling, ETL Processes
Workflow	QA Auditing, Data Validation, Sprint-based Delivery, Peer Review

CERTIFICATIONS

- JP Morgan Excel Skills (Forge)
- Tata Data Visualisation (Forge)
- IBM Data Science 101
- IBM Python 101
- Accenture Data Analytics Simulation

EDUCATION

Bachelor of Computer Applications (BCA)

Sept 2022 – June 2025

Institute of Management Education, Ghaziabad | CGPA: 7.8
